OUR COMMITMENT TO QUALITY

EPA TSCA TITLE VI COMPLIANT

TSG is constantly striving to meet and surpass all requirements for high quality cabinetry. As such, Forevermark Cabinetry products meet the United States Environmental Protection Agency (EPA)'s current standards for compliance with TSCA Title VI. Labeling indicating compliance is on each box and product. EPA's TSCA Title VI, the Formaldehyde Standards for Composite Wood Products Act, establishes the world's most stringent formaldehyde emissions standards for composite wood products. For more information, please feel free to email tsg@tsgcabinets.com or visit www.epa.gov.

Kitchen Cabinet Manufacturers Association*

TSG is proud to offer assembled cabinets that are KCMA certified. KCMA certified cabinets are recognized in the marketplace as a quality product able to perform after a rigorous battery of tests simulating years of household use. For more information, please feel free to contact our offices or visit www.kcma.org.

National Kitchen & Bath Association

TSG is a member at the National Kitchen & Bath Association. Being part of this association keeps us informed with the latest news and developments in the industry. For more information, please feel free to contact our offices or visit www.nkba.org.

*Applicable to certain lines only, contact us for more information.

GREENGUARD GOLD CERTIFIED

from UL Environment

Forevermark Cabinetry is proud to further demonstrate our commitment to the well-being of our customers by offering select lines with UL Environment's GREENGUARD GOLD certification.

The GREENGUARD Certification Program (formerly known as GREENGUARD Indoor Air Quality Certification) gives assurance that products designed for use in indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors. GREENGUARD Gold Certification (formerly known as GREENGUARD Children & Schools Certification) offers stricter certification criteria, considers safety factors to account for sensitive individuals (such as children and the elderly), and ensures that a product is acceptable for use in environments such as schools and healthcare facilities. It is referenced by both The Collaborative for High Performance Schools (CHPS) and the Leadership in Energy and Environmental Design (LEED) Building Rating System.

What is UL Environment, and what is the GREENGUARD Certification Program?

UL is a global independent safety science company with more than a century of expertise innovating safety solutions from the public adoption of electricity to new breakthroughs in sustainability, renewable energy and nanotechnology. GREENGUARD Certification is part of UL Environment, a business unit of UL (Underwriters Laboratories). GREENGUARD Certification helps manufacturers create—and helps buyers identify—interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used.

GREENGUARD Certification standards have established performance-based standards to define products and processes with low chemical and particle emissions for use indoors. The standards establish certification procedures including test methods, allowable emission levels, product sample collection and handling, testing type and frequency as well as program application processes, toxicity limits and acceptance.

GREENGUARD Certification strives to protect human health and quality of life by establishing standards and certification programs to reduce exposure to chemicals and to improve indoor air quality. The GREENGUARD standards are among the most stringent indoor air quality standards in the world, and they are based on available standards and guidelines from national and international public health agencies.

What does GREENGUARD certification do?

Volatile organic compounds (VOCs) are chemicals that are released into the air from everyday furnishings, building materials and products—items like office furniture, flooring, wall coverings and cleaners. Once airborne, VOCs can easily be inhaled by building occupants and trigger a number of health problems.

The GREENGUARD Certification mark communicates that representative samples of a product have undergone rigorous scientific testing to meet some of the world's most stringent chemical emissions requirements. This certification helps reduce indoor air pollution and the potential for airborne chemical exposure.

The GREENGUARD Certification standard addresses the needs of the commercial building industry, focusing on products like building materials, seating, and systems furniture. This standard screens for more than 10,000 chemicals and places stringent limits on over 360 VOCs, including formaldehyde. All UL Environment's GREENGUARD standards also include a maximum allowable TVOC level, or "cap" on the level of all VOCs combined, to account for a product's total emissions.

GREENGUARD GOLD CERTIFIED CONTINUED...

How can GREENGUARD Certification help your business?

Demand for low-emitting products has increased significantly during the past decade. The GREENGUARD Certification program gives you the opportunity to appeal to this growing market by demonstrating that our products contribute to the health and well-being of building occupants.

What else can GREENGUARD Certification be used for?

GREENGUARD Certification is recognized and referenced in numerous building programs, standards and specifications around the world. Products with GREENGUARD Certification or GREENGUARD Gold Certification can contribute to the achievement of points in established green building rating systems, satisfy code or ordinance criteria and meet indoor air quality specific RFP requirements.

The scientific rigor of the GREENGUARD Certification program, combined with more than a decade of educational marketing and outreach initiatives, has made UL Environment's GREENGUARD mark the most recognized eco-label among architects and designers (second only to the Leadership in Energy and Environmental Design (LEED) Rating System). In fact, more than 460 sustainable codes, standards, specifications, and procurements guidelines documents—such as LEED®, Collaborative for High Performance Schools (CHPS), and the International Green Construction Code (IgCC)—recognize, recommend, or require the use of GREENGUARD Certified products.

This standard is designed to define low-emitting materials suitable for environments where people, particularly children and sensitive adults, spend extended periods of time, in particular schools and healthcare facilities.

WATERBORNE UV FINISHES

Forevermark Cabinetry features the use of waterborne UV finishes furnished by Sherwin-Williams on certain door styles.* The benefits of waterborne UV finishes include superior scratch resistance, low VOCs, finishes that are formaldehyde-hazard free, and reduction in environmental impact.

Forevermark Cabinetry is proud to offer products manufactured using Sherwin-Williams coatings as part of our goal to offer high performance products designed and manufactured taking steps to reduce environmental impact and meet or exceed the most stringent regulatory requirements.

You can be sure that the solutions you're choosing satisfy the highest standards for performance, while meeting or exceeding regulatory requirements. Which means you'll never have to choose between the best coatings for the environment and the best coatings for delivering a quality look that lasts.

*Waterborne UV finish by Sherwin-Williams®: AP, SB, AN, TG

FOREST STEWARDSHIP COUNCIL® CERTIFIED

Forevermark Cabinetry is proud to offer select products with raw materials that are Forest Stewardship Council® (FSC) certified through its supplier. The FSC® is an independent, non-profit organization that protects forests for future generations, and is the only system supported by groups such as WWF, Sierra Club, Greenpeace, Natural Resources Defense Council, and National Wildlife Federation. The FSC® protects water quality, prohibits highly hazardous chemicals, restricts deforestation, protects customary rights of indigenous people and local communities, prevents loss of natural forest cover, protects high conservation value forests, and limits clearcuts to protect forest ecology.

By purchasing a FSC-certified product, customers can ensure that their product is coming from responsibly managed sources.

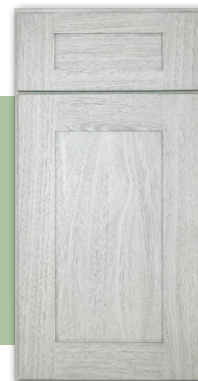

The mark of responsible forestry

NEW!

Eucalyptus Grandis is a consistent, premium hardwood material with the following benefits:

- **Durability** - used often in high-end applications
- **Sustainable & Eco-friendly**
- **High level of dimensional stability**
- **Exceptionally versatile**
- **Superior grain consistency**
