

Measuring Your Space

if you should ever have any questions or need help we are only a phone call away. Plus we will confirm all your measurements!

1. Start by measuring each wall of the room and recording the inside dimensions. Measure at the floor then again in the center of the wall and at the ceiling, this will for accuracy and to ensure squareness. If you ever need help or have any questions please call anytime!
2. Locate the centerline of the sink and record that onto your drawing, indicate water supply, natural gas supply or 220-volt electric services.
3. Next measure each wall individually recording all critical measurements to include all the obstacles and their location (i.e outlets, switches, lights, cables, heat registers, phone jacks, doors, windows).
4. Measure the height of window sill, height and width of the window and doors and height of ceiling and soffits. Record this information on the door, window, and soffit charts.

Appliances and Fixtures

Utilize this chart to record the measurements and information concerning your appliances and fixtures.

If you want to change move or upgrade any appliances our design experts can help you with the latest information available!

Structural Measurements

WINDOWS

Measure each window in the kitchen and record below. All measurements should be from the outside edge of the trim. If window treatments are to be used they will be inside or outside mount.

Record all measurements in inches

Windows	A	B	C	D
1				
2				
3				
4				

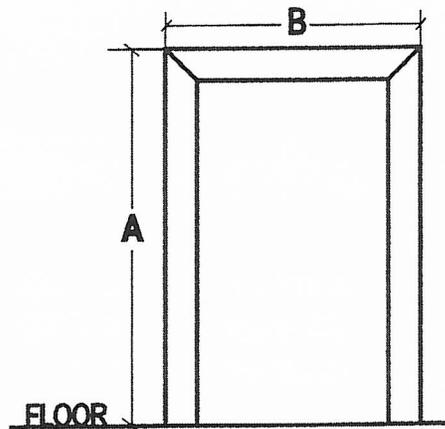

DOORS

Measure each door in the kitchen and record below. All measurements should be from the outside edge of the trim. If patio doors are to have draperies or blinds, they will be inside or outside mount.

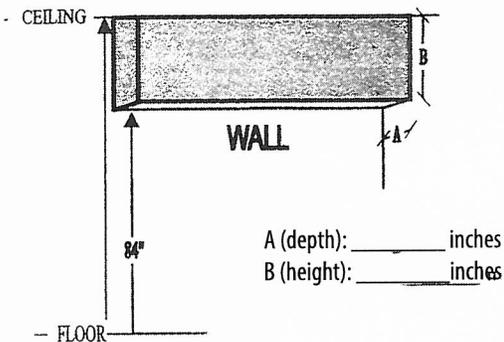

Record all measurements in inches

Doors	A	B	Hinge (L,R)	Swing (in/out)
1				
2				
3				
4				

SOFFIT

A soffit is the bulk head between the ceiling and the top of the cabinets. Distance from the floor to the soffit should be at least 84". Allow 1/4" more if you install a 84" tall cabinet. Soffit depth may vary, however normal depth is 13" or 1" deeper than a wall cabinet. Note: Check the soffit height and depth to ensure the cabinets do not extend beyond the existing soffits.

ROOM DETAILS:

Record all measurements in inches

- _____ A: Ceiling Height
- _____ B: Cabinet Height
- _____ C: Soffiet (depth & height)
- _____ D: Wall Cabinet Height
